SUMMARY

Computer science undergraduate with a solid background in full-stack web development and practical experience in developing various web applications. Proficient in Java, MySQL, and MERN stack. Active participant in coding contests on CodeChef and LeetCode, as well as hackathons. A cooperative team player with excellent communication, leadership, and problem-solving skills. Looking to contribute to meaningful software development teams and push innovative solutions.

EDUCATION

Bachelor of Technology in Computer Science and Engineering | CGPA: 8.93/10   2022–2026
SVERI's College of Engineering, Pandharpur

📂 **Relevant Coursework**: Data Structures and Algorithms, Computer Networks, Operating Systems, AWS Cloud Foundation, MERN Stack development.

SKILLS

Programming Languages	Java, C, Python, JavaScript
Technologies/Frameworks/Libraries	HTML, CSS, ReactJS, NodeJS, ExpressJS, IPFS
Databases	MySQL, MongoDB
Soft Skills	Communication, Leadership, Adaptability, Teamwork, Problem-solving
Tools and Services	Git, GitHub, VS Code, Postman, Vercel

EXPERIENCE

Full Stack Development Trainee   June 2024 | Jul 2024
Katare Informatics   *Solapur, Maharashtra*

- Learned to develop full-stack web applications, using HTML, CSS, JavaScript, PHP, and MySQL with XAMPP.

PROJECTS

Decentralized Cloud Storage System | *React.js, Node.js, Express.js, MongoDB, IPFS* | 🔗   Mar 2025

- Built a decentralized cloud storage platform with React.js, Node.js, and MongoDB. Designed a clean UI for uploading, retrieving, and deleting files seamlessly.
- Integrated IPFS for secure, tamper-proof, distributed storage, ensuring data availability and integrity across nodes.

Apex English School Website | *React.js, Tailwind CSS, React Router, Vercel* | 🔗   Dec 2024

- Built a fully responsive website using React.js and Tailwind CSS for **Apex English School, Patoda (Beed)**, highlighting the school's legacy, curriculum and educational values
- Implemented React Router for seamless page navigation including Home, About, Academics, and Contact sections.

JourneyMate - Travel Website | *HTML, CSS, JavaScript, MySQL, Vercel* | 🔗   Aug 2024

- Created a responsive travel site with live weather data, safety alerts, and location discovery for 100+ global cities.
- Integrated OpenWeather for real-time weather updates and Geoapify API for location and discovering nearby places.
- Deployed using Vercel for high-speed global access.

EXTRA-CURRICULAR ACTIVITIES

- **Finalist** in HackEra, a **36-hour national-level hackathon** hosted by Sanjay Ghodavat University, Kolhapur.
- Led the college football team in **university-level tournaments**, fostering **leadership, teamwork, and discipline** on and off the field.
- Organized and coordinated a **Coding Competition** during **OLYMPUS 2024** at **SVERI's College of Engineering** with 80+ participants Managed end-to-end execution, improving participation rate by 35% compared to the previous year.
